

One QAR record (patient 7665777-11)

QUESTION (templated, recurs across all patients)

COPIED SOURCE NARRATIVE × 2 (context + verification_ctx)

the extracted fact:
11 characters (0.3%)

ANSWER: "COVID-19"

2,660 characters — 72% of the record

GENERATED REASONING (820 ch)

What is actually new?

Redundant

2660 ch (72%)

copied source

Trainable

831 ch (22%)

newly generated

Overhead 206 ch (6%)

template + scaffold

The extracted fact is

240× smaller

than the source text copied to support it
